What is it good for?

With a VPN, you can connect to the University of Ostrava network. This gives you access to OU services that may not be available directly from the internet.

Who is the service available for?

The service is available for all students and staff of the University of Ostrava and for external users who need to access the University of Ostrava network.

How can I connect?

Users can use a VPN connection using the SSL-VPN client FortiClient. After installing the FortiClient client on your device, your device will be assigned with the IP address of the OU network.

Link to download

https://play.google.com/store/apps/details?id=com.fortinet.forticlient_vpn&hl=cs&gl=US

At Google play select: FotiClient VPN

Setup parameters

For the name (VPN Name) enter: VPN OU, type VPN select: SSL VPN
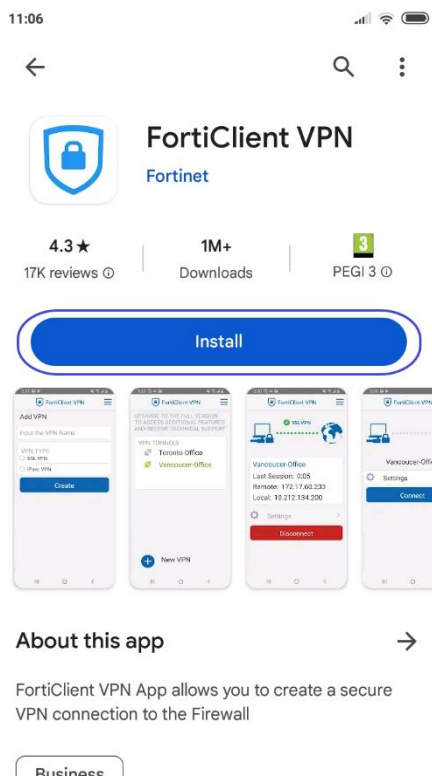

Remote gateway address enter: vpn.osu.cz

Username: enter your portal login name here, usually in the form of last name (novak)
