THE LINGUISTIC SIDE OF THE DISCUSSIONS OF YOUNG CHRISTIANS IN CYBERSPACE

ABSTRACT *The present article introduces the results of the analysis of texts by Czech (Catholic) Christian young adults published in 2019 and 2020 on the website signaly.cz. This page is intended to unite Christians and support them in their faith. The texts are diverse in genre, their content is purely religious or secular, but it at least remotely touches on the issues of the spiritual life of man or his/her religiosity (“soft spirituality”). Posting on the internet testifies to the need for young people not only to strengthen themselves and others in their faith in God, but also to share trivial content that relates to daily life and behind which (in the background) they see God’s will, the expression of God’s love and wisdom.*
