## THE IMAGE OF POVERTY ILLUSTRATED IN PHRASEOLOGICAL UNITS AND PROVERBS CONTAINING NAMES OF CLOTHING

**ABSTRACT** *The subject of this paper are old and contemporary phraseological and paremiological units which contain the image of insufficient clothing as one of the indicators of poverty. Research material, collected on the basis of phraseological and paremiological dictionaries, has become essential for recreating various elements of the linguistic image of the world: old realities, convictions and judgements preserved in fixed word combinations.*

**KEY WORDS** *paremiology, phraseology, linguistic image of the world, poverty, clothing*
